

PRINCE VERMA

+91 9336204954 theprincepatel007@gmail.com [LinkedIn](#) [GitHub](#) [LeetCode](#)

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript

Data Structures & Algorithms: Problem Solving, Recursion, Backtracking, Graphs, BFS, DFS, Dynamic Programming, Greedy Algorithms, Hashing, Sliding Window, Two Pointers, Heap, Priority Queue

Frontend Technologies: React.js, Next.js, Angular, TypeScript, HTML5, CSS3, Tailwind CSS

Backend Technologies: NodeJS, ExpressJS, REST APIs

Databases & ORM: SQL, MySQL, MongoDB, PostgreSQL

Tools & Platforms: Git, GitHub, Docker, Linux

AI & LLM Tools: Prompt Engineering, Gemini API Integration, LLM API Usage

EXPERIENCE

Full Stack Developer — Coding Blocks

Jun 2024 – Jun 2025 Remote Internship

- Integrated frontend components with backend REST APIs following a structured development workflow.
- Debugged application-level issues by analyzing logs, API responses, and network activity.
- Documented recurring issues, fixes, and system behavior, improving team knowledge sharing.
- Used Git-based version control for collaboration and change tracking.

PROJECTS

LADDER — Productivity Platform (Full-Stack SaaS Application)

[Live](#) [GitHub](#)

ReactJS, NodeJS, ExpressJS, MongoDB Atlas, GitHub API, JWT

- Built a full-stack productivity platform where users manage tasks, track performance, and receive AI-driven insights.
- Developed an AI chatbot that generates personalized productivity suggestions based on user activity and stored data.
- Implemented secure JWT authentication and REST APIs for user-specific data handling.
- Designed a task system with real-time productivity score calculation and an interactive dashboard with heatmap visualization.
- Integrated GitHub API to fetch commits and streaks, enabling users to monitor coding consistency.
- Added a feedback system with image upload, dynamically displayed on the platform for user validation.

MAPNATION — AI-Powered Learning Platform

[GitHub](#)

MongoDB, ExpressJS, ReactJS, NodeJS, Gemini API

- Built a personalized learning platform that generates dynamic daily learning roadmaps and adaptive quizzes using AI-based prompt engineering.
- Designed and implemented a full-stack MERN architecture with modular REST APIs for roadmap generation, quiz management, and user progress tracking.
- Integrated Gemini API to generate structured learning content and personalized recommendations.

MOCK-MASTER — AI Interview Preparation Platform

[GitHub](#)

ReactJS, NodeJS, ExpressJS, Gemini API

- Developed an AI-powered mock interview platform that simulates technical interviews and provides AI-generated feedback.
- Built a responsive frontend to manage question flow and session tracking.
- Implemented backend logic for answer evaluation and feedback generation.
- Integrated Gemini API for dynamic question generation and response analysis.

CERTIFICATIONS & LEARNING

- Solved 300+ Data Structures & Algorithms problems; regular participant in coding contests.

EDUCATION

GLA University

2022 – 2026

B.Tech in Computer Science & Engineering
